

# Instructions to Authors

## Types and lengths of manuscripts

**Please note:** The *European Journal of Endocrinology* no longer accepts experimental papers.

The journal publishes original research papers, reviews, rapid communications and case reports within clinical endocrinology. There are **no submission charges**. Articles **up to six printed pages** in length will incur **no publication charges**. A six-page article is approximately 4500 words, however, allowance must also be made for figures and tables. Additional pages will incur a charge of €350 per printed page. Rapid communications must be limited to a maximum of three printed pages and should include no more than one figure, one table and fifteen references.

Correspondence related to published work is published at the discretion of the Editorial Board. Letters should not exceed one printed page, including references, one table or one figure. Authors of the work being discussed will ordinarily be allowed to reply.

## Submission of manuscripts

**The *European Journal of Endocrinology* only accepts online submissions.**

Guidelines for this can be found at [http://www.eje-online.org/misc/onlinesub\\_man.shtml](http://www.eje-online.org/misc/onlinesub_man.shtml). For any queries, please contact the Editorial Office at [eje@endocrinology.org](mailto:eje@endocrinology.org)

## Authors' statement

The covering letter must include the following statement signed by all authors:

*"The author(s) hereby confirms that neither the manuscript nor any part of it, except for abstracts of less than 400 words, has been published or is being considered for publication elsewhere. By signing this letter each of us acknowledges that he or she participated sufficiently in the work to take public responsibility for its content."*

This letter should also include (a) information on duplicate publication or submission elsewhere of any part of the work, (b) a statement of financial or other relationships which might lead to a conflict of interest, (c) permission to reproduce illustrations that may identify human subjects, (d) the name, address, telephone number, fax number and email address of the corresponding author. In the event that an author is added or removed from the list of authors, written acceptance signed by all authors should be submitted to the editorial office.

Authors may suggest reviewers, and may also identify persons who they would prefer not to be consulted, stating their reasons.

To expedite refereeing, authors should supply copies of any references cited as 'In Press'.

Authors should ensure that they hold all relevant permission to cite the unpublished observations of other workers (the names and initials of all these workers should be cited in the text, and permission obtained from them all), and also for the reproduction or adaptation of any figures or tables that have been published previously (permission should be obtained from the original publisher and author(s)).

Equal consideration is given to all manuscripts in English from any country. Statements in articles are the responsibility of the authors.

Authors should keep copies of everything submitted.

## Copyright

Authors are asked to retrieve a copyright transfer form which is available at <http://www.eje-online.org/misc/copyright-form.html.dtl>. This will need to be completed and signed by **all authors** before the paper can be published. Once the form is completed it should be returned by fax to the Editorial Office at the following number +44-1454-642201.

Requests to reproduce material, such as tables and figures, which has been published in the *European Journal of Endocrinology* should be sent to the Permissions Secretary at [permissions@bioscientifica.org](mailto:permissions@bioscientifica.org)

## Preparation of manuscripts

Manuscripts should have a line spacing of 2 (double-spaced) in a serif font (e.g. Times), with a size of at least 10 point.

**Title page** This should carry the title of the article, the names and addresses of all authors (the institution to which the work is to be attributed should be listed first), the name, address, fax number and email address of the corresponding author, and a short running title for page headings. The word count of the full article should also appear in the title page.

**Abstract** This should be divided using the headings Objective (giving the context of the study), Design, Methods, Results and Conclusions. It should be easily understood, without the need to refer to the main text, and should have a maximum length of 250 words. All abbreviations should be defined.

**Text** For original research papers, this should generally comprise the Introduction, Materials and methods or Subjects and methods, Results, Discussion, and any

Acknowledgements. The arrangement of material for other types of article is at the discretion of the authors, but should in general conform with the requirements for original research papers. All abbreviations should be defined at the point of first occurrence. **From 1 January 2007 the European Journal of Endocrinology will publish papers on GH data only if expressed in mass units of IS 98-574.**

**References** References should be cited in numerical order in the text, and listed in this order at the end of the paper. **All authors should be listed.** Titles of papers and journals **should be written in full.** The standard format for references is shown in the following examples.

- 1 Inkster S, Yue W & Brodie A. Human testicular aromatase: immunocytochemical and biochemical studies. *Journal of Clinical Endocrinology and Metabolism* 1995 **80** 1941–1947.
- 2 Matthews CH, Borgato S, Beck-Peccoz P, Adams M, Tone Y, Gambino G, Casagrande S, Tedeschini G, Benedetti A & Chatterjee VK. Primary amenorrhoea and infertility due to a mutation in the  $\beta$ -subunit of follicle-stimulating hormone. *Nature Genetics* 1993 **5** 83–86.
- 3 Royer P. Hormonal regulation of calcium metabolism: biology and pathology. In *Pediatric Endocrinology*, edn 2, ch. 6, pp 477–543. Eds J-C Job & M Pierson. New York: John Wiley & Sons, 1981.

*European Journal of Endocrinology* reference style for End-Note (version 3 and above) is available from the online author guidelines at <http://www.eje-online.org/misc/ifora.dtl#prep>. **Please note that papers with incorrectly formatted references will be returned and the acceptance date changed to the date of receipt of the correctly formatted paper.**

**Figures** Figures should be supplied separately from their legends, and each figure should be clearly numbered and on a separate page. Avoid the use of shading or stripes, as these are difficult to reproduce. Original photographs are essential for all half-tone images and colour work. Authors should plan figures so that they remain clear when reduced to fit within a single column in the journal (82 mm wide). Please mark the reverse of all copies of any figure that needs to be wider than this for clear presentation. Authors will be asked to pay the costs of any colour reproduction and must do so by credit card before publication. Please see the colour charges form at [www.eje-online.org/misc/Colourackeje.pdf](http://www.eje-online.org/misc/Colourackeje.pdf). EPS and TIF files can be accepted.

Figure legends should enable the figure to be understood in isolation from the main text. Unusual abbreviations should be defined. It should be stated whether values presented are means  $\pm$  S.E.M., means  $\pm$  S.D., etc. Where statistical analyses have been performed, probabilities for comparisons should be clearly stated and the tests used should be named. Magnifications should be indicated by means of scale bars wherever possible.

**Tables** Each table should be provided on a separate page and should have a line-spacing of 2 (i.e. double-spaced).

It should be possible to understand each table in isolation from the main text. In general, instructions for the preparation of figure legends apply.

**Gene nomenclature** Manuscripts should be prepared in accordance with accepted gene nomenclature. Gene symbols for mice and rats should be in italics with only the first letter capitalised. Protein designations should be the same as the gene symbols except that all letters should be capitalised and in roman (i.e. not italicised). For example:

Gene symbol: *Sox2*  
Protein designation: SOX2

Gene symbols and protein designations should conform to the Rules for Nomenclature of Mouse and Rat Strains.

Gene symbols for humans, non-humans and domestic species should be in italics with all letters capitalised; protein designations should be the same as the gene symbols but not italicised. For example:

Gene symbol: SOX2  
Protein designation: SOX2

Gene symbols and protein designations should conform to HUGO Gene Nomenclature guidelines.

## Ethics

When reporting experiments on human subjects, indicate whether the procedures followed were in accordance with the ethical methods of the responsible committee on human experimentation (institutional or regional) or with the Helsinki Declaration of 1975, as revised in 2000 (<http://www.wma.net/e/policy/b3.htm>). Do not use patients' names, initials or hospital numbers, especially in any illustrative material.

When reporting experiments on animals, please follow the guidelines that can be found at <http://www.frame.org.uk/reductioncommittee/journalguidelines.htm>

Papers reporting clinical trials will only be considered if the trials have been pre-registered according to the guidelines set out in *The Lancet* **364 Issue 9438** 911–912, available at <http://www.endocrinology.org/sfe/espere/Lancet%20article.pdf>

## Offprints

Offprints can be ordered on the offprint order form which will accompany the proofs.

## Supplements

Peer-reviewed proceedings and reviews may be accepted for publication as a supplement to the *European Journal of Endocrinology*.

The organizer(s) or author(s) of the meeting will be responsible for the full costs of the supplement. For further information, please contact the Chief Editor at [eje@endocrinology.org](mailto:eje@endocrinology.org)

## Forthcoming events
